Essential requirements include but not limited to:

- 5+ years programming experience in an object-oriented program language for e.g. Python, Java
- Experience of designing and maintaining AWS Cloud Infrastructure
- Mentoring less experienced engineers
- Experience running scrum meetings

JUNIOR DEVELOPERS

Essential requirements include but not limited to:

- 2+ years programming
- Significant hands on experience in the web, internet and technologies
- Knowledge and experience in Python or Java
- Knowledge and experience in web frameworks for e.g. Django, Grails
- Experience using Javascript and frontend frameworks, e.g. Vue.js
- Experience writing RESTful APIs

TECHNICAL PROJECT MANAGERS

Essential requirements include but not limited to:

- 5+ years in technical project management
- Experience in managing major projects in support of market development, activation team and account managers
- Technical liaison experience between client facing teams and engineering/development teams
- Managing and liaising with technical and solutions partners to effect integrations and other required activity
- Assist with technical pre-sales and technical training (focused on integration)
